

PRESS RELEASE

Procudan A/S takes over the activities of Presmann ApS

From 1 January 2026, Procudan will take over the activities of Presmann ApS, which means that Procudan will expand its range of fruit products to customers throughout the Nordic region.

Kolding, 20 October 2025

The takeover of Presmann's activities is based on almost 25 years of close cooperation between the two companies. In the future, customers in the Nordic region will have access to a wider range of semi-processed tropical fruits and an even closer connection to producers in Thailand.

A natural development of the collaboration

After almost 25 years in the market, Presmann is transferring all business activities and customer relationships in the Nordic region to Procudan.

- Procudan and Presmann ApS have worked closely together for many years. With the takeover, we are continuing this collaboration in a new form, where customers will have access to an expanded range and can continue to count on the same secure framework as before, says Tommy Højtoft Pedersen, Owner and CEO of Procudan A/S.

Søren Presmann adds:

- We have a shared understanding of the market and customer requirements. It is therefore a natural step for Procudan to take over the activities of Presmann ApS. I will continue through Presmann Thailand, where I will contribute with quality assurance and local knowledge, so that customers experience continuity and a stable transition.

A wider range – same security

The takeover means that Procudan will offer an even wider range of semi-processed tropical fruits, complementing the existing selection. At the same time, the strong relationships with producers in Thailand, built up over many years, will be maintained.

With the activities combined, Procudan's role as a strategic partner for food producers in the Nordic region is strengthened, enabling it to offer solutions tailored to customer needs.

Presmann ApS will continue to handle all deliveries until the transfer takes effect on 1 January 2026.

About Procudan A/S

Procudan are experts in ingredients and packaging, and dedicated to developing value in collaboration with customers and partners.

Procudan combines a deep understanding of customer needs with a proactive and developmental approach. This ensures efficiency and value throughout the supply chain – from raw materials to finished products. At Procudan, we insist on thinking solutions before products and value before price, so that we can deliver the best and most valuable solutions to our customers.

About Presmann ApS

Presmann ApS was established in 2000 with the purpose of importing and distributing high-quality food products from Thailand. Over the years, the company has focused primarily on fruit-based raw materials for food producers, mainly in Denmark, and has built strong relationships with producers in Thailand and a large customer base in the Nordic region.
